The diagram illustrates the experimental setup. A subject is seated at a table, looking at a video screen. A video camera is positioned above the screen. A horizontal bar is placed between the subject and the screen. The screen displays a target (a small circle) and a starting point (a small circle). The subject's hand is positioned at the starting point. The diagram is labeled with 'Subject', 'Video Camera', 'Video Screen', 'Horizontal Bar', 'Target', and 'Starting Point'.

in use at the present time, and they can compare favourably with the same heavy and good water wheels as possessing endorbin

Strength, it is Speed, and giving a more uniform Steady Motion, and out of the cut (and the foot) to break out [and] will also rise and fall more readily under a low head than other wheels in use.

As there is no disadvantage which this Wheel has over the ordinary one, it is constructed with but few parts, and is simple in its construction. It is made of large and allows the "drift stuff" to pass over the top of the Wheel.

Persons wishing to adapt the BESSEMER process to their own use, or to call and examine before purchasing, will do so at the place where the Wheel is made.

We would also call the attention of Mill
